

Contents

Foreword by Gabriele Congiu.....	VIII
Foreword by Jeff Mottle.....	IX

00- Introduction..... XI

Objective of the Book	XII
How the Book Is Structured.....	XII
Style Guidelines: How to Read the Book.....	XII
Contents of the DVD-Rom	XII

01-First Steps with the 5SRW Method 1

The 5-Step Method.....	2
The Method and Chiaroscuro	3
The Right Version.....	4
Activating V-Ray.....	4

02-Chiaroscuro Is the Key 7

Chiaroscuro Is the Key	8
<i>Exercise: How to Correct an Image in the VFB</i>	11
The Shape of Light.....	15
Adapting to Changes in Lighting.....	18
History Tool.....	21

03-Rendering Modes 23

What Is Indirect Lighting?	24
V-Ray Default	26
IPR – Interactive Progressive Rendering	26
Final Render Settings.....	28
VRayDenoiser.....	30
V-Ray GPU	34
Overview	36
Render Tests	36
Final Renders	36
Auto Exposure	37
When to Avoid Auto Exposure	39
Resumable Rendering.....	40

04-Using V-Ray Like a DSLR Camera	41
DSLR Cameras and the V-Ray Physical Camera	42
The 3ds Max Physical Camera.....	44
The Default Exposure Is Different.....	45
The Basic Properties of a DSLR Camera.....	46
Depth of Field.....	48
<i>Exercise: How to Simulate Depth of Field.....</i>	49
EV and Depth of Field.....	50
The Bokeh Effect.....	51
White Balance.....	52
All This in the V-Ray Physical Camera	54
Practicing with a Real DSLR Camera	55
05-Light Balance	57
Types of Lighting.....	58
What Are Bank Lights?.....	58
Light Sources that Can Be Simulated Using V-Ray	59
V-Ray Light Parameters	60
The Size-Intensity Ratio	61
Lighting an Object with One or Two Bank Lights.....	62
Four-Tier Lighting Hierarchy	65
Chromatic Contrast	66
Balancing an Interior (Artificial Lighting)	67
Natural Lighting with a Single Source.....	72
06-From Basic to Advanced Materials	77
Creating a VRayMtl	78
Interface for Controlling Surface Properties	79
<i>Exercise: How to Create Materials.....</i>	80
Tricks for Chromed Metal and Glass.....	84
Suggestions for (Overly) Complex Materials.....	85
Colored Metal and Pearlescence	87
Anodized Metal.....	88
Dispersion (Abbe Number).....	89
Translucent Materials (Thin).....	90
Translucent Materials (with Thickness).....	91
V-Ray Blend Material.....	92
<i>Exercise: How to Use a V-Ray Blend Material.....</i>	92

The Max Depth Option	95
A Word about Glass and Reflective Objects	95
How to Create a Materials Library	96
Creating Materials for a Scene.....	97
07-Controlling Tone Distribution	101
The Three Types of Exposure.....	102
Compression of Highlights: Color Mapping or VFB?	104
Relation Between Highlights and Contrast	106
<i>Exercise: How to Manage the Exposure Based on the Lighting.....</i>	<i>109</i>
What Is a LUT and How to Use One	112
08-Exterior Rendering.....	115
The Characteristics of Exterior Rendering.....	116
Framing	117
Eliminating Vertical Distortion	118
Balancing Lights/Shadows	119
Elongated Shadows.....	120
Absence of the Horizon	121
Consistent Sky and Background	122
Vegetation Using Forest Pack	124
09-V-Ray Sun System	127
Lighting in Exterior Simulation	128
<i>Exercise: How to Place the V-Ray Sun in a Scene.....</i>	<i>129</i>
V-Ray Sun	131
V-Ray Sky	135
How to Control the V-Ray Sky.....	136
How to Replace the V-Ray Sky in Post-Production	137
<i>Exercise: How to Create a Lighting Hierarchy in Night Renders</i>	<i>139</i>
10-V-Ray Fur, Bump and Displacement	145
Bump	146
Displacement.....	148
Displacement + Bump.....	150
V-Ray FUR	151
Simulating a Rug	151

Simulating Fur	153
<i>Exercise: How to Combine Displacement and Fur</i>	<i>155</i>
11-Complete Flow of the 5SRW Method	161
Framing.....	162
Primary Light Settings.....	163
SkyLight Portal	164
Chiaroscuro Assessment.....	165
Materials: Mapping Reflections.....	168
Translucent Plastic	170
Final Rendering.....	171
Post-Production: Color Correction	172
12-IBL, HDRI Maps and Other Lights	177
HDRI Maps and IBL Lighting.....	178
Controlling HDRI Maps in V-Ray	179
Example A: Modelling the Scene with a HDRI Map	180
<i>Exercise: How to Illuminate an Exterior Night Scene using a HDRI</i>	<i>181</i>
Example B: Placing an Object in an Environment with HDRI	184
<i>Exercise: How to Place an Object in an Environment</i>	
<i>Illuminated with HDRI</i>	<i>184</i>
Example C: Illuminating an Interior.....	188
HDRI and Different Atmospheres.....	190
Other Types of V-Ray Lights.....	192
Sphere Mode	192
How to Create a V-Ray Light Mesh.....	193
V-Ray IES and the IES File.....	194
13-Chiaroscuro Analysis Techniques.....	197
Objectifying with Small Portions.....	198
Testing the Lighting	199
Modelling by Subtraction	200
Relationship between Flat Images and Contrast.....	203
Gian Lorenzo Bernini and 3D Models	204
14-Optimizing Photographic Sequences	205
Brute Force and Irradiance map	206

Process with the Denoiser Tool	207
<i>Exercise: How to Optimize an Animation - 1st STEP Pre-calculation</i>	208
<i>Exercise: How to Optimize an Animation - 2nd STEP Calculation</i>	209
<i>Exercise: How to Optimize an Animation - 3rd STEP Denoiser Tool</i>	210
Pre-Calculating the Whole Global Illumination	211
Chaos Cloud	212
Process Outline	214
15-Tips & Tricks.....	215
Detail Lights	216
<i>Exercise: How to Triangulate the Position of a Detail Light</i>	217
Production Report/Ratio	221
White Balance (Empirical)	222
Beyond the Bevelled Edge.....	224
Instability – Security Tools.....	225
Creating 360° Images.....	226
360° Stereoscopic Images.....	228
